

## Tool Output

### Jake

...like I mentioned with FlexLint it gives you so many warnings and sifting through them is so... arduous that whenever I just look at it I'm like eh-h-h forget this.

## User Input and Customizability

### Andy

Like you know it's like is this list prioritized by you know what's important to me? No. You know? And there may be a default listing that should be prioritized because like this one's inefficient

## Supporting Teamwork

### John

The only reason I like the batch results is to communicate, broadcast to the team a sense of progress or lack of progress.

## Result Understandability

### Matt

so I click in there I think and it gives me a light bulb and it says ok so now I wanna know why raising a string exception is bad. Like what should I be doing instead? Since it thinks it's a problem. And so none of these really help me.

## Workflows

### Mike

Clang is my favorite. It's built in, into the compiler. You don't have to invoke anything special

## Tool Design

### Chris

I don't mind the idea of the actual source code itself having some plasticity to it so that let's say the fourth line there was some error here...having the 5<sup>th</sup> line drop down and having the content expand with maybe all sorts of annotations about my code.
